Still Pending

Assignment 3B

11th of April, 2018

University of Agder/University of Nebraska, Omaha

Ali Al-Musawi, Eirik Fintland, Peter Kwasa and Osman Younas

Assumptions, Clarifications, and Comments:

CALC_PERCENT_OF_GOAL_PF:
Assumption: Returning a negative number to denote an error is acceptable for the function.

VIEW_CART_PP:
Assumption: The gratuity entries in the donation carts are records that will exist in the database as part of the Donation tables and as such are not explicitly coded into the package procedure.

ADD_WEBSITE_PP:
Assumption: The original website order is already in sequence (as illustrated in assignment 2) and the procedure is not responsible for re-sequencing orders that are modified outside of the procedure. This means, if the existing order is 1-2-4, there is no expectation that the procedure corrects the order to 1-2-3-4 when a new website is added.

ADD_DONATION_PP:
Assumption: Due to some confusion on whether or not we were allowed to add new tables, we initially designed this table for I_DONATION_DETAIL, while later discovering that we were allowed to create new tables if we wanted to, provided that the pre-existing structure was untouched.
This provided some issues during development, which were unfortunately unsolved as of 11.04.2018.

UPDATE_DONATION_PP:
Assumption: Same as ADD_DONATION_PP.

CHECKOUT_PP
Assumption: Confusion with the structure made it difficult to execute this procedure completely

STATUS_UNDERWAY_PP

Assumption: I had some confusion with the updating the status to "open" and "underway and the select count in status underway. The problem was solved by using SUM and Update in a correct way.

PROJ_TYPE_PP

Assumption: straightforward, from assignment 2.

A brief description of the contribution of each group member:

Eirik Fintland

For this assignment, I contributed to the group effort by working on **CHECKOUT_PP, ADD_DONATION_PP** and **UPDATE_DONATION_PP**. I attended the group meetings we held over Discord, but unfortunately due to illness I was unable to attend most of the in-person meetings that were held in Kristiansand. My personal performance throughout this assignment was also inhibited due to this illness, and therefore I had to request help for my share of the work.

Peter Kwasa

For this assignment, I contributed to the group effort by working on the **ADD_WEBSITE_PP** which is one of the procedures that was not required in assignment 2. I created the new **CREATE_ACCOUNT_PP**, **CALC_PERCENT_OF_GOAL_PF**, AND **VIEW_CART_PP**. I also corrected an issues with **STATUS_UNDERWAY_PP**. I attended the group meetings and worked with the group to establish delivery dates and division of work.

Osman Younas

For this assignment, I contributed to the group effort by working on **STATUS_UNDERWAY** and **PROJ_TYPE,** which is one of the procedures from assignment 2. However, I had some difficulties and issues with **STATUS_UNDERWAY**, which led to that I had to request help from Peter Kwasa. I have been working on different procedures as well. I also attended the group meetings and worked with the group everytime when needed. How e

Ali Al-Musawi

For this assignment I contributed to the group effort by working on **CHECKOUT_PP** and assisting in **UPDATE_DONATION_PP** and **ADD_DONATION_PP** . I have attended every group meetings through discord and worked with the group in LAB whenever needed.
